**Subject:** RE: Question

YES. My question referred to solid waste, not RIM

Cecilia - Since RIM material is already being taken off site, the following assumes your question is referring to hauling the non-impacted waste offsite as well.

Response:

We have limited methods of estimating the impact to the schedule since we are still unsure what the RPs plan is for putting in the barrier and handling the waste.

Variables include:

- \*Size of staging area/stockpiling area (caution - too big of a stockpile area leads to odor/bird hazard issues)
- \*Excavation rate
- \*RIM Screening rate (assumes even north part of excavation will require some screening)
- \* Number of loaders to load disposal trucks
- \* Number of trucks scheduled to haul waste to off-site disposal site
- \* Distance to disposal site (turn-around time for trucks)

I may be off base on what you are asking so call or respond. Also, I will be at the CAG tonight and can discuss with Jeff and Dan.

Subject: [EXTERNAL] Question

Question from my front office - if the solid waste is hauled off-site versus capped in place on-site what would be the impact to the project schedule ?
